

WEBSITE HANDOVER

Rising Sun Bungalows

Gili Meno, Lombok · five lumbung bungalows

A short guide to the live site, what is already set for search engines, and how you edit words and photos in the CMS. Please read this on your phone or laptop, then tell Carl when you are happy.

Current live address (please test here first)

<https://rising-sun-bungalows.netlify.app/>

This is the real public site right now. It is hosted on Netlify. **Your own domain name is not attached yet on purpose.** Look at this address, tap every button, try the booking form, check WhatsApp, and look at it on a phone. When you are happy, tell Carl and he will handle DNS and point your domain at this same site. Nothing you like will be rebuilt from scratch — we only change the address people type.

What was built

A one-page stay website for Rising Sun Bungalows: photos, prices, long-stay, café, how to get there from Bali and Lombok, a booking request form, and scuba with **Meno Dive Club**. The bungalows are **operated and run by Meno Dive Club**. Stay bookings are on this site; diving is booked at menodiveclub.com. There are **five** lumbung bungalows. Nightly from 500.000 IDR. Booking email: risingsunbungalows@gmail.com. WhatsApp is the number already on the site.

Behind the scenes the page is generated from your content (words and photos). When you save in the CMS, that content is stored and the public page is rebuilt. You do not need GitHub, code, or design tools.

SEO — complete for this site. Please leave it.

On-page and technical search work is finished to the current lodging-site standard (Google Search Central, mid-2026): unique facts in the HTML, complete lodging structured data, visible FAQs, a 1200×630 share card, and crawler files for Google and for AI assistants. There is nothing useful left to add on this page. Extra ranking from here comes from Google Business Profile, guest reviews, and a mention on menodiveclub.com — not from more tags. Please do not edit browser title, meta description, share image, or heading structure in the CMS. If a fact changes (price, bungalow count), tell Carl or change only that fact.

Checks run before this handover: independent SEO review of the live URL against the source; heading map H1–H5; JSON-LD graph check; robots.txt user-agent grouping; keyword and long-tail map (Gili Meno bungalows, harbour stay, Bali fast boat, Bangsal, Gili Islands, dive and stay, Meno Dive Club); confirmation that menodiveclub.com is the official dive brand and URL; share-card dimensions 1200×630 with exact type; discovery files `llms.txt`, `llms-full.txt`, `agents.txt`, `ai.txt`, `.well-known/ai.json`, `sitemap.xml`. Guidance used: Google’s July 2026 note on generative AI in Search (helpful unique content, standard crawlability — Google does not rank `llms.txt`), plus 2026 lodging schema / GEO checklists.

What was done	On the live site
Google snippet	Title: Rising Sun Bungalows Gili Meno bungalows from 500K IDR. Description: five lumbung, 2 min from harbour, operated by Meno Dive Club, 500.000 IDR/night, fast boat from Bali, dive and stay.
WhatsApp / Facebook share	OG title, description, and a 1200×630 card with exact text (name, five lumbung, 500.000 IDR, operated by Meno Dive Club). Do not replace the share image.
Headings H1–H5	H1 Rising Sun Bungalows. H2s: stay, long stay, café, untouched Gili Island, dive and stay, how to get to Gili Meno, FAQs, book. H3–H5 only where there is real content (amenities, rates, routes, FAQ questions, harbour arrival).

What was done	On the live site
Copy / long-tail	Harbour walk, Gili Islands, Bali fast boat (Sanur / Serangan / Padang Bai), Bangsal, LOP, Gili Trawangan vs Meno, monthly Wi-Fi stay, dive and stay, five bungalows, operated by Meno Dive Club. “Gili Meno Dive Club” only as a search variant.
Google structured data	LodgingBusiness + GuestHouse, Organization (Meno Dive Club as operator), FAQPage (visible questions, matching IDs), WebSite, BreadcrumbList, contact, geo, offers. No fake star rating.
Crawlers & assistants	robots.txt (admin blocked for all bots), sitemap, llms.txt, llms-full.txt, agents.txt, ai.txt, .well-known/ai.json. AI crawlers allowed (GPTBot, OAI-SearchBot, Claude, Perplexity, Google-Extended).
Usability / technical	Canonical, hreflang, skip links, breadcrumb trail, branded 404, WebP photos, lazy-load, visible NAP (address, email, WhatsApp). Search-category SEO can sit at 100. A photo-heavy homepage will not score 100 on “page speed” — that is the photos, not a missing tag.

How you log in to the CMS

The editor is here (same site, /admin at the end):

<https://rising-sun-bungalows.netlify.app/admin/>

- Carl will send you a **Netlify invite** to your email. Open that email on the same phone or computer you will use to edit.
- Click the invite, set a password. Keep it somewhere safe. This is not a Google login unless you choose that option.
- Go to the /admin/ link above and sign in.
- If the page asks you to log in and nothing happens, wait for Carl's invite — the lock is on until that email is sent.
- Do not share the login outside the family who should edit the site.

How to use the CMS (once you are in)

On the left you will see collections. Open one, change the fields, then **Save / Publish**. The public site usually updates in one or two minutes. Refresh the live page (not /admin) to see it. If a photo looks huge, wait — the rebuild may still be running.

Open this	You can change
Site settings	Price, number of bungalows (5), WhatsApp number, booking email, Instagram, map pin, check-in / check-out times, café is not here — café is on Homepage.
Homepage	Hero words and photo, key facts, stay text and gallery, long stay, café badge (“Opening soon”), island cards, diving words, how to get there, booking form labels.
FAQs (Google)	Questions at the bottom of the page (price, operator, boats, dive and stay, five bungalows, monthly, contact, pets).
Thank-you page	The short message after someone sends a stay request.
New photos	Use the image picker and upload. New files go into the uploads folder. Keep photos upright, well lit, and of the real bungalows. Add a short alt description (what is in the picture).

Please do — and please don't

Please do	Please don't
Update prices, café news, monthly-rate wording, photos of the five bungalows, WhatsApp number, and FAQs when something actually changes.	Do not change colours, layout, fonts, or the "Search / social" SEO boxes (browser title, meta description, share image) unless Carl is with you. That work is already set. Changing it for fun will mess up Google and WhatsApp previews.
Keep stay bookings as Rising Sun Bungalows. The site is operated and run by Meno Dive Club. Official dive name: Meno Dive Club — not "Gili Meno Center".	Do not invent a café opening date, a monthly price, or room occupancy unless it is true. Do not delete whole sections. Do not publish other people's photos without permission.

Booking form

Guests request dates on the site. There is no card payment on the form. Replies should go to **risingsunbungalows@gmail.com**. Check that inbox (and spam) after a test booking. If a test does not arrive, tell Carl — the mailbox routing is a one-time Netlify setting on his side.

When you are happy — domain / DNS

This is the important bit for later: **once you have looked at <https://rising-sun-bungalows.netlify.app/> and you are happy, tell Carl. He will then set DNS and put the site on your own domain.** Do not change domain settings at your registrar until he asks — a wrong click can take the site offline. Until then, share the Netlify link, or wait for the proper address.

Questions, a login invite, or something that looks wrong: WhatsApp Carl, or write risingsunbungalows@gmail.com and copy him in. Built by BoonMind — boonmind.io. Handover date: 2 September 2026. SEO pass dated to current (August–September 2026) search guidance.
